

MT5 SR ZONES

System Manual

Risk warning

Before you begin trading on Real account please carefully consider your investment goals, risk and experience you have. It should be noted that Forex is a leverage based market. It should be remembered that leverage can work both in your advantage and disadvantage as well. Therefore there is high risk of losing a part or all of your financial input placed on your account and because of that you should remember to trade with the amount of money which you can lose without taking any influential financial damage.

- Restart your MT5

- Find SR Zones MT5 indicator on your Navigator tab

- Double click it (or drag on the chart)

- Confirm with OK

The software is ready for trading

Settings

Indicator parameters are pretty straightforward.

For most traders we recommend to leave it with default settings.

Important settings:

- Sensitivity changes the type of calculations of the zones

If you wish to make any changes, please switch this and see how the zones are displayed. For most traders 'High Sensitivity' is better than 'Low Sensitivity' as it simply displays more significant zones.

01 Bars for trend lines calculations (max: 10000)	5000
01 Bars for support/resistance zones calculations (max: 2000)	1000
Sensitivity	High sensitivity
👉 Show support/resistance zones	true
👉 Hide support/resistance price labels	false
👉 Show zone touch points	true
👉 Show zone labels	true
👉 Show zone distance labels	true
👉 Show trend line labels	true
🎨 Color of the resistance trend lines	SeaGreen
🎨 Color of the support trend lines	Chocolate
01 Width of unbroken lines (btwn: 1-5)	1
📏 Style of normal trend line	Solid
📏 Style of broken trend line	Dot
📏 Style of horizontal level line	Dash
01 Right side overhang (number of bars, btwn: 0-30)	15
01 Chart shift (btwn: 10-50)	17
👉 Chart on foreground	false
👉 Draw lines in the background	false
👉 Is it an offline chart?	false
👉 Make global variables (for S/R zones)	false
01 Display scale (for 4K or higher display, default: 100)	100

If you wish to change the global color of the zones and background:

- right click on chart and pick 'properties'
- change the background color
- switch the timeframes once

Indicator will adjust all the zones to the current background
